What Should You Do If You're Interested in a Manufacturing Career at Apache?

Tech College

Area technical colleges offer a variety of majors, program lengths and costs that can get you into your career of choice quickly. Check out industrial, fabrication and engineering programs at your local technical college.

College

Look into majors in degreed programs such as engineering and operations for careers in manufacturing management.

High School

Talk to your guidance counselor about on-the-job work programs like the Youth Apprenticeship program. Sign up for manufacturing tours at school.

Fabrication Specialists

Metal Finisher

Knowledge and experience using hands on tools are desired skills for Metal Finishers. It is important to be able to read an engineering drawing and be detail oriented to perform the quality of finish expected in the project.

Recommended Coursework: High school diploma, experience, Middle College program.

Machinist

CNC milling and lathes, drills and saws are among some of the equipment operated by a Machinist. Individuals will need to measure, inspect and perform tasks to required tolerances.

Recommended Coursework: AA Degree, Youth Apprenticeship Graduate (Apache), Boot Camp

Welders

Apache's welders work on a variety of projects with everyday being something different. They calculate requirements, study metals and perform prep-work required for the projects. We also look for good communicators who can share their ideas and problem solving skills.

Recommended Coursework: Welding certification, AA Welding, Youth Apprenticeship Graduate (Apache), Middle College Graduate, Boot Camp

In addition to skilled trades career opportunities, Apache also recruits people with experience or education in accounting, administrative support, estimating and customer service.

Engineering and Tech Careers

Mechanical Engineer

We are looking for individuals who can provide project management, calculations and design of Apache's equipment using Solid Works. Knowledge of manufacturing, accuracy and good communication skills are very important. Mechanical engineers work with sales, production and purchasing staff as well as customers.

Recommended Coursework: Bachelor of Science in Mechanical Engineering and /or equivalent experience.

Engineering Technician

We are looking for candidates with a strong background in drafting and Solid Works in order to design components for Apache's equipment products. Accuracy is extremely important as is communication skills.

Recommended Coursework: Associate of Applied Science Degree and / or experience.

We manufacture tanks, vessels, platforms, conveyors, and food processing equipment using stainless steel and high alloys.
